Amendment of Parts 21 and 74 of the Commission's Rules With Regard to Licensing in the Multipoint Distribution Service and in the Instructional Television Fixed Service for the Gulf of Mexico, WT Docket No. 02-68 RM-9718

Dear Ms. Dortch:

On Wednesday, October 8, 2003, Peter Pitsch of Intel met with Erik Salovzzra of the Wireless Bureau and Evan Kwerel of the Office of Strategic Policy regarding the above referenced proceedings. Mr. Pitsch discussed the potential benefit of the industry's proposal for reforming the MMDS and ITFS bands and how it might be improved by applying the simultaneous exchange and other recommendations in OPP Working Paper Number 38. In particular, Mr. Pitsch discussed possible ways that an auction of the unassigned ITFS spectrum could be structured to facilitate the use of this spectrum for new wireless data services and at the same time meet the needs of the ITFS community. He recommended that the FCC not limit eligibility for such an auction to ITFS eligibles.

Pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, a copy of this submission is being provided to Evan Kwerel. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

/s/ Peter K. Pitsch
